About.

Tersan Shipyard Inc. is one of the major global shipyards in Europe, serving its customers as a trusted partner in shipbuilding and in ship repair industries. Tersan Shipyard is fully private owned, and has its roots in maritime business many years back.

The Shipyard is belonging to Tersan group of companies providing value-added services in diversified Maritime sectors,

- i) new ship building,
- ii) ship repair, docking & conversion,
- iii) ship owning & operation,
- iv) ship agency services,
- v) yacht refit & repair.

The enthusiasm and marine culture that Tersan's founders shared, encouraged the group to be more present in Turkey's maritime industry. As the first step in order to accomplish this target, the group acquired a shipyard area with a floating dock in Istanbul's Tuzla shipyard's region in 1998, with this move the group extended its portfolio into ship repair, maintenance, overhaul and ship docking. Success in repairing and docking of around 50 to 70 ships per year brought rapid development to Tersan Group into the new ship building sector very soon.

While the repair yard remained in Tuzla, Istanbul, is still active, Tersan's ship building division moved to Yalova in 2008. In 2013, with starting operation of new floating dock in Yalova, also repair activities has begun. In 2019, Tersan started the operation of Aframax Size floating dock which was also built by shipyard in Yalova. Tersan's new building & repair yard in Yalova is today, one of the biggest, most modern and efficiently organized shipyards in Europe. Repair and docking of around 150 ships are successfully carried out annually in the Tersan Shipyard. Total number of workforce reaches up to 5.500 depending on the workload of the projects.

FLOATING DOCK NO.1

Length : 130 m
Inner breadth : 22,5 m
Lifting Cap : 6.500 tons
Dock Cranes : 2 x 5 tons

FLOATING DOCK NO.2

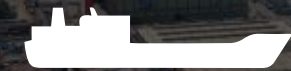

Length : 180 m
Inner Breadth : 29 m
Lifting Cap : 9.000 tons
Dock Cranes : 2 x 10 tons

FLOATING DOCK NO.3

Length : 310 m
Inner breadth : 51m
Lifting Cap : 50.000 tons
Dock Cranes : 2 x 25 tons

 70.000 sqm Closed
350.000 sqm Total Area

 9 m Docking Draught
20 m Depth and 2000 m Length at Repair Bets

 4 x Aframax size
Vessel Repair Capacity at the same time with Full Access

 1000 Permanent Employees
Up to 5.500 Workers

 SWL 550 Tons
Lifting Capacity

Average stock of
20.000 Tons
Steel Plates & Profiles

 10 Tons / Day
Steel Production Capacity

 Export Leader of Ship Building Sector
in Turkey for 9 of last 10 years.

 Well Equipped in-house
Mechanical Workshop
with more than 150 workers

FLOATING DOCK NO.1

 Lifting Cap : 6.500 tons
 Dock Cranes : 2 x 5 tons

FLOATING DOCK NO.2

Length : 180 m
 Inner Breadth : 29 m
 Lifting Cap : 9.000 tons
 Dock Cranes : 2 x 10 tons

FLOATING DOCK NO.3

Length : 310 m
 Inner breadth : 51m
 Lifting Cap : 50.000 tons
 Dock Cranes : 2 x 25 tons

FULL GREEN ENERGY CONSUMPTION

In-house rooftop and land based solar energy plants consisting of 59.609 pcs solar panels
Roof-top and land based solar panels
Usage of %100 renewable green energy provided by I-Rec certificated Tersan Owned wind farms

MATERIAL SOURCING

In line with keeping sustainable economical activity, alternative material sourcing is a must! We use hydroblasting instead of grit for sustainable production.

RECYLING OF WATER

We collect surface washing waters and rainwater, treating them in our chemical treatment facility with a capacity of 75 m3/hour. This prevents them from mixing with surface contaminants and flowing into the sea, thus safeguarding our marine environment. This initiative has been ongoing since 2022

ELECTRIC VEHICLE USAGE INSIDE SHIPYARD

OTHER CARBON REDUCTION PROJECTS

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented.

- Maintained ISO 14001 certification, recognising a framework is in place for continuous environmental performance improvement
 - Completed refurbishment of our offices, incorporating a full upgrade to LED lighting
 - Completed energy audits at all offices as we look to identify further opportunities for energy use and emissions reductions
 - Installed PIR sensor lighting wherever possible at our offices
 - Invested significantly in video conferencing technology at our offices
 - Invested in training to further develop the skills and knowledge base of our people in relation to sustainability and carbon emissions reduction
- In the future we hope to implement further measures such as:
- Implementing a continuous improvement methodology to improve the environmental management system;
 - To facilitate a more comprehensive assessment of the emissions associated with our supply chain, we will also continue to enhance our procurement strategy which includes minimum environmental standards for suppliers
 - Continue to enhance the quality of our data, ensuring our reporting is robust, comprehensive and backed up by evidence
 - Switching to more efficient equipment to increase energy efficiency in facilities,

In Yalova premises, **4.000 sqm** closed workshop area is dedicated to mechanical works. The workshop has a wide range of machinery to handle following items as Engines, Tailshafts, Propellers, Pumps, Heaters, Boilers, Pv Valves-Safety Valves, Various Type of Propulsion Systems as CPP, FPP, Azimuth etc. Also capable of performing the Ultrasonic & Chemical Cleaning and Stress Relief-Formula 62, etc.

Tersan mechanical workshop has approved procedure from DNVGL for performing the Propeller Repairs

Tersan in-house mechanical workshop has approved procedure from **DNVGL** for performing the Propeller Repairs

Tersan in-house mechanical workshop can produce various size of chrome liners and seal housings up to **1000 mm** diameter. In workshop, there are plenty of stock chrome liners with different sizes, ready for final machining.

Keeping forged shaft materials ready in stock with DNVGL & BV Certification.
Flange Type : Up to 650 mm
Round Type : Up to 350 mm

In-house mechanical workshop is able to lift tailshafts up to **14 mtrs** length and **2 mtrs** diameter. Lifting capacity of lathe machine is **90 tons**. Shipyard also have various size of raw material to produce tailshafts.

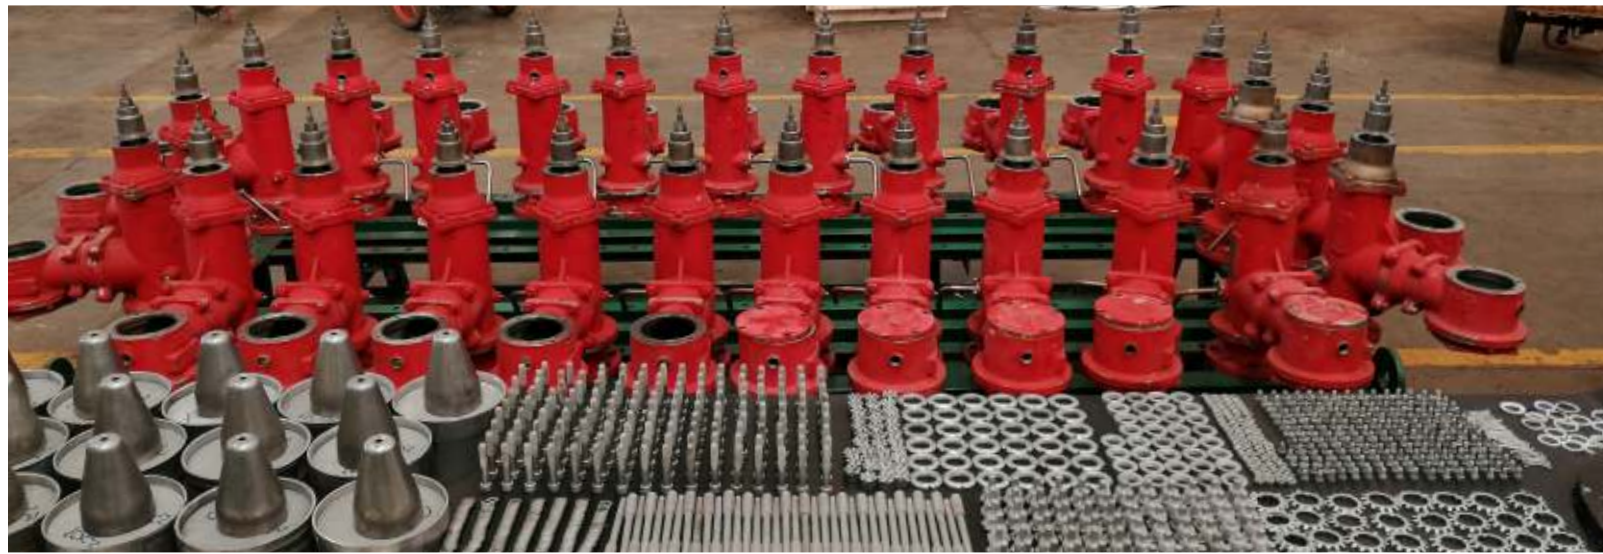

Tersan in-house mechanical workshop can handle any kind of rudder repairs and can fabricate rudders according to approved drawings by classification societies

Tersan in-house mechanical workshop can perform overhauling of various type of propulsion systems as CPP, Azimuth, Schottel, Voith-Schneider etc. by means of experienced own workshop team.

With more than **150** experienced permanent workers, the in-house workshop is able to perform all kind of mechanical repairs such as winches, pump, valves, graps, hyd. cylinders etc.

Tersan in-house workshop has ultrasonic and chemical cleaning machine for heat exchangers. And in-house capable of performing the retubing of heat exchangers.

Total 10.000 sqm/day
Closed Blasting & Paint Halls

The daily grit blasting capacity is around
10.000 sqm up to SA 2 standard

100 nozzles blasting capacity
at drydock & repair berths

Silicon Paint Application
on Hull & Propellers

- 3.000 bars UHPW Blasting
- 400 sqm/ hours Total WA2 Capacity

Dockmate

- Up to 3.000 bars pressure
- 110 sqm/ hour SA2 (WA2)
- Reach up to 32 meters high

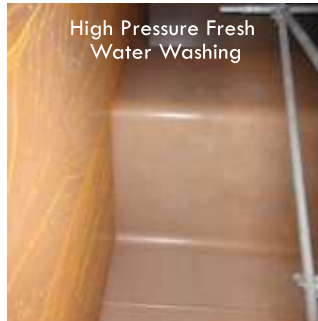

Dockboy

- Up to 3.000 bars pressure
- 55 sqm/ hour SA2 (WA2)
- Reach up to 13 meters high

Cargo Tank Coating Reference List

We are capable of performing cargo tanks & ballast tanks re-coating works with all reliable paint suppliers including Marine Line, Interline, Sigma Coatings, etc.

14.000 sqm closed area with 5 sets of CNC Plasma Cutting Machines for steel works

9.000 sqm closed area for stainless steel & aluminium works

Steel renewal capacity on ship repairs up to **10 tons** per day

All welders and welding procedures certified by DNVGL

More than **500** certified welders

6.000 sqm dedicated area with **16 tons** crane capacity for stocking the steel plates & various profiles

The pipe workshop has 1.500 sqm closed area with a capacity up to 2.000 dia / day fabrication of steel, stainless and copper pipes for cargo, ballast, heating and hydraulic systems.

The workshop is capable of cold bending and high quality pipe fabrication with dedicated workers. Stainless steel and mild steel pipe works are manufactured.

The piping workshop has also good references on GRE / GRVE pipes manufacturing and installation.

- Electrical maintenance works are performed by our own electricians and services from reliable workshops for repairs and rewinding of motors, alternators and converters.
- For electronic parts, we are in good cooperation with authorized services and reliable workshops.
- Voltage / frequency converter providing supply voltage 440V 60 Hz

AN EXCELLENT SHIP REPAIR ON TIME

Tersan Shipyard started using and gaining experience in the scrubber system for many years. This system has begun to be utilised worldwide in 2019 and 2020. However, the first scrubber system installation in Turkey was accomplished by Tersan Shipyard in 2016.

Scrubber system installations carry on in our yard by means of our expert teams. Tersan has sufficient experience in GRE/GRVE pipes pre-fabrication & installations and also has a dedicated closed workshop for required preparations. As of first quarter of 2026, 23 pieces scrubber unit have been installed successfully. Enlarging the list with signed fresh agreements for the upcoming period.

Tersan New Ship Building Department is export leader of ship building sector in Turkey for last 7 years. The together of the Repair and New Building departments provides a great advantage. However, having the most modern facilities in the region, having a lot of experience about ship building, ship repair and conversion; always makes Tersan the top destination for all complex conversion projects (Livestock Carriers, Asphalt Bitument Tankers, Cement Carriers, LNG Vessels, etc.)

HSE Department employs more than 70 personnels which include specialists, engineers and certified controllers.

Tersan Shipyard has certificates for ISO 9001, ISO 14001, OHSAS 18001. In addition, Tersan has been granted by DNVGL, RMRS for construction of ships, welding of hull structures and pipelines.
