

## NB1083 – ZENITH (ЗЕНИТ)

Zenith (ЗЕНИТ) is a Crab Catcher & Processing Vessel designed to harvest king and snow crab in northern Russian waters, under severe weather conditions and reinforced for ice conditions. The vessel is designed for both single and longline pot harvest, and is fully outfitted for onboard production, freezer storage and offer transhipment. She has 1150m<sup>3</sup> refrigerated storage capacity, and a processing deck capable of cooking and processing 60 tons of Kamchatka crab per day to produce 40 tons of final frozen product. Since almost all the crab vessels in the World are converted from existing fishing or other types of vessels, at this size she is a “first in the World” to be designed as a crab vessel from scratch.
